Professional Profile

A full-scholarship graduate with a mechanical engineering background, bringing hands-on experience with SOLIDWORKS, ANSYS, and MATLAB, I pivoted that analytical and technical foundation into the world of AI and automation, rapidly advancing to lead the AI Automations department at SEOMarketing.com. There, I built and deployed production automations across a wide ecosystem of platforms including Make.com, N8N, Supabase, Google Cloud, and many more, delivering results for major clients such as PlanITROI, CISONow, TP Digital, and 911 Restoration across the USA, Asia, and Europe. A C2-level English speaker and native Spanish communicator with working knowledge of Italian and French, I also bring strong leadership and assertive communication skills to cross-functional projects. What sets me apart is the rare combination of formal engineering rigor, deep hands-on AI automation expertise, and a proven track record of delivering real products for international clients in a fast-moving environment.

Education

UNIVERSIDAD AUTÓNOMA DE OCCIDENTE

Cali, Valle del Cauca, Colombia

B.S. in Mechanical Engineering. Full Scholarship Graduate.

July 2020 – May 2025

Thesis: *Numerical Study of Non-Spherical Harmonic Particles in Simple Shear Flows*

(<https://hdl.handle.net/10614/15976>)

LICEO ANGLO DEL VALLE

Cali, Valle del Cauca, Colombia

Technical High School Diploma in Business Management

July 2020

Experience

SEOMARKETING.COM

Remote

AI Automations Manager

May 2024 – Present

- Led and managed the AI Automations department, overseeing a team of specialists, tracking project progress, and ensuring timely delivery across multiple simultaneous client engagements.
- Onboarded and trained new department members, translating complex technical concepts into actionable workflows and maintaining team performance standards.
- Acted as the primary problem-solver for real-time technical issues, rapidly adapting strategies in response to platform changes, client pivots, and evolving AI tooling.
- Collaborated across multidisciplinary teams to deliver scalable automation solutions, bridging technical execution with clear communication to stakeholders.

Skills & Interests

Technical: Make.com, N8N, MCP Servers, Claude Desktop, Prompt Engineering, Python, JavaScript, JSON, APIs, HTTP Requests, GitHub, Docker, Railway, Supabase, Google Cloud, Google Analytics, Airtable, Notion, Google Workspace, GHL, Anymailfinder, Buzz.ai, PhantomBuster, Apify, IgnitePOST, Giftsenda

Laboratory: SOLIDWORKS, ANSYS, MATLAB, Octave

Language: Spanish — Native, English — C2 (EF SET Certified), Italian — B1, French — A2

Soft Skills: Leadership, Team Management, Assertive Communication, Problem Solving, Adaptability, Quick Learner, Proactivity, Cross-functional Collaboration, Real-time Decision Making, Training & Mentoring, Project Management, Critical Thinking, Attention to Detail, Time Management, Prioritization, Process Optimization, Stakeholder Communication, Results-oriented

Mindset, Strategic Thinking, Creativity, Accountability, Emotional Intelligence, Resilience, Autonomy

Interests: Urban dance styles, motorcycles, gym
